

PROPANE / NH₃ Transport Trailers

Maximize Load Potential

Our knowledgeable sales staff and on-site engineers are equipped with experience to complete the most detailed custom built trailers at our facility.

- ▶ Equally distributed weight between axle and tractor
- ▶ Up to 19,400 gallons tank capacity
- ▶ A-train, B-train configurations

Quality Craftsmanship

Built strong for the long road ahead, our standard manufacturing practices and commitment to employee education reduces premature wear and failures.

- ▶ Welders are certified by the American Society of Mechanical Engineering
- ▶ On-site weld inspector and X-ray technicians
- ▶ Baked on, high-quality Dupont™ Imron® Elite paint for long lasting finish
- ▶ Design and manufacture our own vessels

Customize Your Trailer

We have the resources and experience to fully customize any transport unit.

- ▶ Built to your specs
- ▶ Meet customer needs
- ▶ More flexibility
- ▶ In-house design engineers

LPG / NH₃ Transport Trailer Standard Features and Sizes

Exactly What You Need in a Transport

Standard Unit - 10,600

Standard Unit - 11,500

Standard Unit - 12,600

Standard Unit - 14,500

Stainless Steel Undercarriage

Lift Axle

Brake Interlocking Gate

LPG / NH₃ Transports

Volume and Configuration

15,200 Gallon with Single Lift Axle

Flexibility to Choose

“ The **engineers** were **very receptive** of the changes we wanted. One of the ideas we had was to build a **smaller diameter barrel**. That was important to us because it **lowered** the center of gravity. So we built a **custom trailer** that we feel **performs well**, but we feel is **much safer** too.”
