

CO₂ & PROPANE Transport Trailers & Portable Storage Units

Quality Manufacturing

Our quality controlled manufacturing procedures are in place to reduce premature maintenance and failures.

- ▶ Welding certified by the American Society of Manufacturing
- ▶ Welds are X-rayed to ensure effectiveness
- ▶ Baked on, Dupont™ Imron® Elite paint reduces rusting and chipping

Extra Tank Protection

Our Spray-on foam insulation keeps your product stable and safe from damaging natural elements.

- ▶ Reduces corrosion
- ▶ Eliminates extra moisture

Road Friendly Design

During our design and manufacturing processes, we eliminate extra weight to keep you light on the road and moving efficiently.

- ▶ Built to maximize your load capabilities

CO₂ Transport Trailers & Portable Storage Units

Exactly What You Need in a Transport.

Sizes

Options Beyond Standard

23,200 Gallon

23,200 Gallon with Stainless Steel

8,200 Gallon with Stainless Steel Jacket

6,000 Gallon

Flexibility to Choose

“ Usually there’s a line up of trucks and they don’t like to see anybody on-site longer than what they have to because of time. So, it’s nice to work with something that has such a **simple design**, that **does what you want** it to and you can **go in, unload**, and get out **quickly**. ”
